

## Project Profile Concrete Repair, Decorative Roof Element

When this elaborate concrete roof started to crack and fail around the edges

**ADVANCED Polymer Repairs** got the call.

Using a unique, 100% epoxy concrete repair system which can be applied up to 6" thick on vertical surfaces and 3" thick overhead without slumping

**ADVANCED** had this roof repaired in only one day.

The repair system chosen was immediately coated with a color matching coating to seal the concrete adjacent to the repair.

**ADVANCED Polymer Repairs** specializes in "the tough jobs".
