

Project Profile

Bathroom & Shower Rehab

Before

The shower / bathroom shown is one of 12 recently renovated by the **ADVANCED Polymer Repairs** team. The units looked dated and had failing grout which caused leaks into areas below. Estimates for conventional rehab ran from \$4,500 to \$5,500 per bathroom/shower unit. With tight budget demands the facility turned to **ADVANCED** for a more cost effective and longer lasting alternative.

After

The **ADVANCED** team has done hundreds of similar repairs at **Hospitals, Nursing Homes, Colleges, Universities and Prisons**. Using a unique system of high performance repair products the failing grout was repaired and then the entire unit coated in a system which completely seals the grout, reduces cleaning and maintenance costs substantially and results in an attractive and modern looking bathroom.

All 12 units were completed in less than two weeks at a cost of less than \$2,000 per unit.

Total savings:
\$36,000.00
