

Project Profile

Concrete Deck Water Proofing & Restoration

ADVANCED Polymer Repairs has worked with this Casino/Hotel for many years so we got the call to repair, waterproof and restore this 14,000+ S.F. concrete deck. Cracks, failing concrete, water leaking into the casino floor were some of the challenges faced by the **ADVANCED** crew. A video outlining the entire repair procedure is available and

shows the repair procedures and products used on this project.
